

Inspirations Catalogue 2016

Welcome

Welcome to Hyllteknik’s Inspirations Catalogue.

This is a tool developed as inspiration for interior-solutions for everything from institutions, schools, catering and cloakrooms to hospitals, laboratories and much more. The tool at the same time provides a good overview of our products.

The catalogue is divided into 3 sections:

- 1. The different shelf systems
- 2. A variety of combination options, material and colours
- 3. Specifications with article number and measurements.

Section 1 is divided into the following product groups:

- **Shelf systems:**
The core of our activities is this unique storage concept, there are 6 different systems, which are all shown here.
- **Shelf systems, stainless:**
Some of the shelf systems are also available in stainless steel. This chapter contains a complete overview of all of these products.
- **Tables, chairs and other accessories:**
Additional products like cabinets, bookend, etc. and our range of tables and chairs.
- **Customised design:**
Have the shelf system just as you would like it.

Enjoy! – We hope you will become inspired.
Our Customer Service is happy to help you on phone +46 (0)472 10085 or e-mail kundservice@hyllteknik.se

Concept & history

Our strength – Made in Sweden

Technology

Quality and environment

Design

Flexibility

Our ideas are yours. And that's how its been for 58 years. Our primary product developers are in fact our customers. Regardless of whether it's about customised interior systems for the small office or warehouse storage in industrial premises we ensure that they work – both visually and functionally.

We call it the supporting concept.

Hyllteknik was started by Harald and Leif in 1957. Hedlund with the ambition to develop and produce Sweden's strongest and most flexible bracket and upright systems. Today Leif's son Peter has taken the tradition further by developing Hyllteknik into a modern, technological and rational industrial company.

Our strength is that we have all the processes within the company, which makes us a strong supplier, but also a subcontractor which during recent years has become an important part of our business.

Constantly using modern technology is not just important but also fun and a challenge in itself. Our products are traditional, but our manufacturing processes have developed over the course of time as new technology comes to light. Our goal is to be at the forefront within all areas. We build most of the specialist machines and punching tools ourselves.

Our products will withstand use in tough environments and maintain a constant high quality so as to function satisfactorily for many years. For us, quality is also feeling and efficiency in the assembly, so it is a key point when we develop new products. Many of our shelf systems have undergone quality testing, in which relevant environmental requirements are set. Information about testing standards and materials for each product is available in our document archives on our website. There you also find the document "Quality-and eco-labeled products", which contains an updated list of which products that are approved and what they are approved for.

From a traditional point of view upright and bracket systems have not had any particularly exciting designs. Functionality and price have been the most important. During recent years we have tried to change that by offering a large range of colours and products with higher design value without it costing that much more. It has been so successful that it will be a key feature in the development of new products. We are certain that our customers will appreciate it.

Flexibility permeates most of what we stand for. Range, production and customer service. Despite our name we develop more than just shelf systems. Our broad basic range accommodates everything from flexible hanging systems to ergonomic work tables. If you wish we can create special solutions that comply with your ideas and needs. To ensure the highest possible quality and delivery security we manage the entire production ourselves from tools to coating.

Shelf system Permanent

Shelf system Flexible

The Hyllteknik principle

The need to create tailor-made functional and flexible interiors is increasing more and more. We see this as a challenge. Hyllteknik's interiors systems are based on quality and flexibility and have largely unlimited applications.

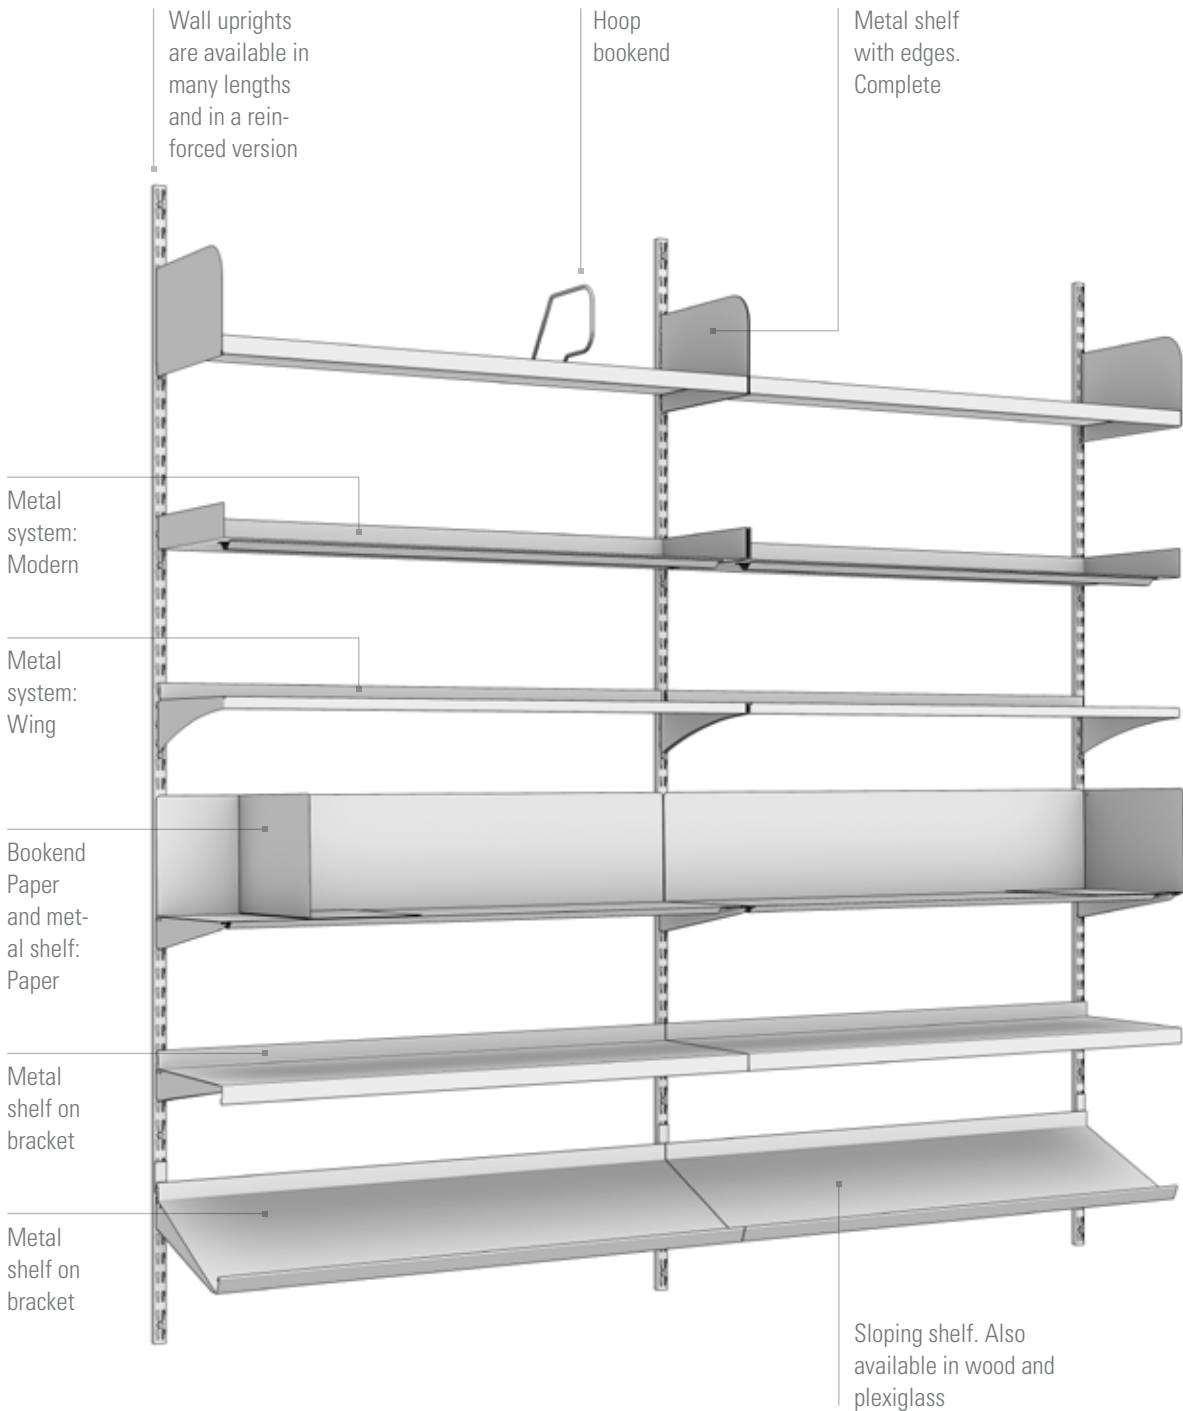

Through the choice of material and accessories you decide yourself, if the expression is to be exclusive and simple.

Hyllteknik's upright system is based on two different models i.e. either a permanent wall system or a flexible hanging system, and has the following advantages:

- The upright system can be coated in many colours.
- Shelves and accessories are available in many materials, like e.g. steel, compact laminate, melamine in birch and beech, glass, etc.
- Flexible and easy to suit different environments.
- Focus on price and functionality.
- Quality materials that last for many years.
- All production is carried out in Sweden and is therefore of high quality with delivery security.

Permanent wall system

Description of function

Permanent wall systems made of steel are a simple and stylish solution. Wall uprights are mounted on walls.

Wall uprights are also available in an extra strong variant and in a design consisting of both wood and steel. A super simple and very sustainable solution.

Can be coated in many different colours. See measurements on page 124 and colours on page 120.

Permanent wall system

Model: Modern

Metal box

A5, A4 and A3 model

In addition to the above,
work tables are also shown
— see page 92.

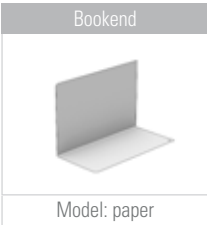

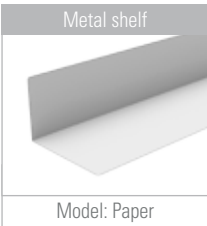

The “Modern” shelf model floats out from the wall. A specially developed design provides the shelf with the same strength and stability as our other shelves.

Flexible wall system

Easily adapted to new needs

The "Paper" shelf is a completely unique combination of strength and elegance. The special design makes the "Paper" shelf very stable and strong. At the same time the design is thin and elegant.

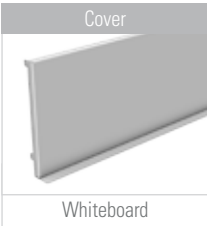

Flexible wall system

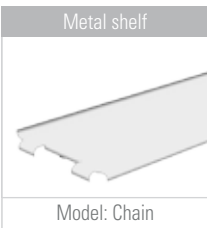

Easily adapted to new needs

"Cover" is designed by Mikael Jepsen who is known from the pop group the Ark. Mikael wanted in a stylish and functional way to cover the hole pattern. The result was a décor panel which is made in steel. By combining these in different colours you could design your own wall and make your own expression.

Flexible wall system
Easily adapted to new needs

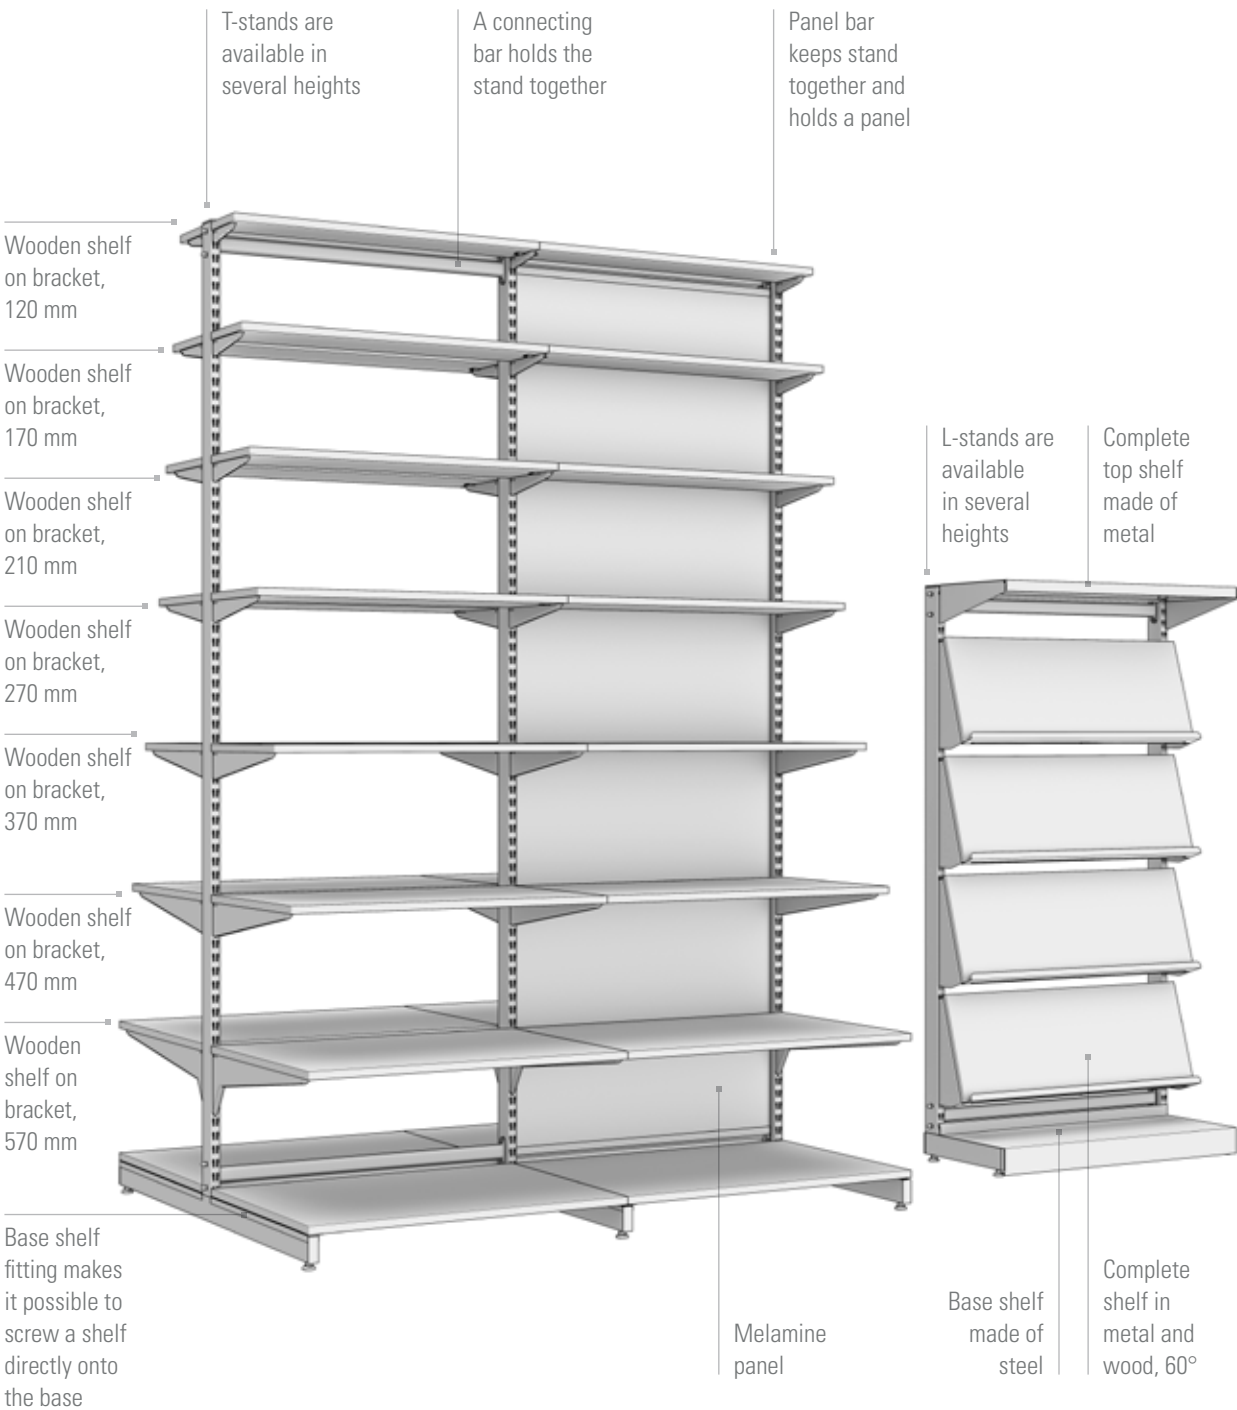

Shelf "Chain" combines both design with strength and materials with functionality. The console is made in massive wood in either birch or oak.

Freestanding L + T stand

Description of function

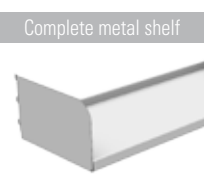

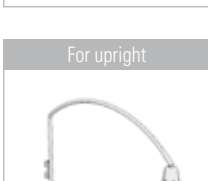

Hyllteknik's freestanding shelf systems consist of two models, where the stand is shaped like a T and a L, like the name. In addition, they function as storage, L + T can also function as a space divider. The system can be provided with sound absorbers covered with fabric or panels in melamine-coated chipboard. The T stand is provided with wheels. See measurements on page 125 and colours on page 120.

Freestanding L + T stand

Space divider and storage in one

Freestanding L + T stand

All Hyllteknik's products can be combined and in this way create a context in the room. Here is a combination of our shelves, tables and chairs.

In addition to the above, the Flexible wall system is also shown – see page 24.

Ceiling & Floor System

Description of function

Create a different and functional interior with the Ceiling and Floor system. The system has a lightness about it, but it is at the same time sustainable and practical.

For example, in spaces where you prefer not to have feet and is easy to keep clean. Shelves can be mounted on both sides of the upright.

It is also possible to provide panels in the system. See measurements on page 125 and colours on page 120.

Ceiling & Floor System
Functional and unique interior

In addition to the above, the Permanent wall system product is also shown – see page 10, and rolling drawer units on wheels.

Ceiling & Floor System

Functional and unique interior

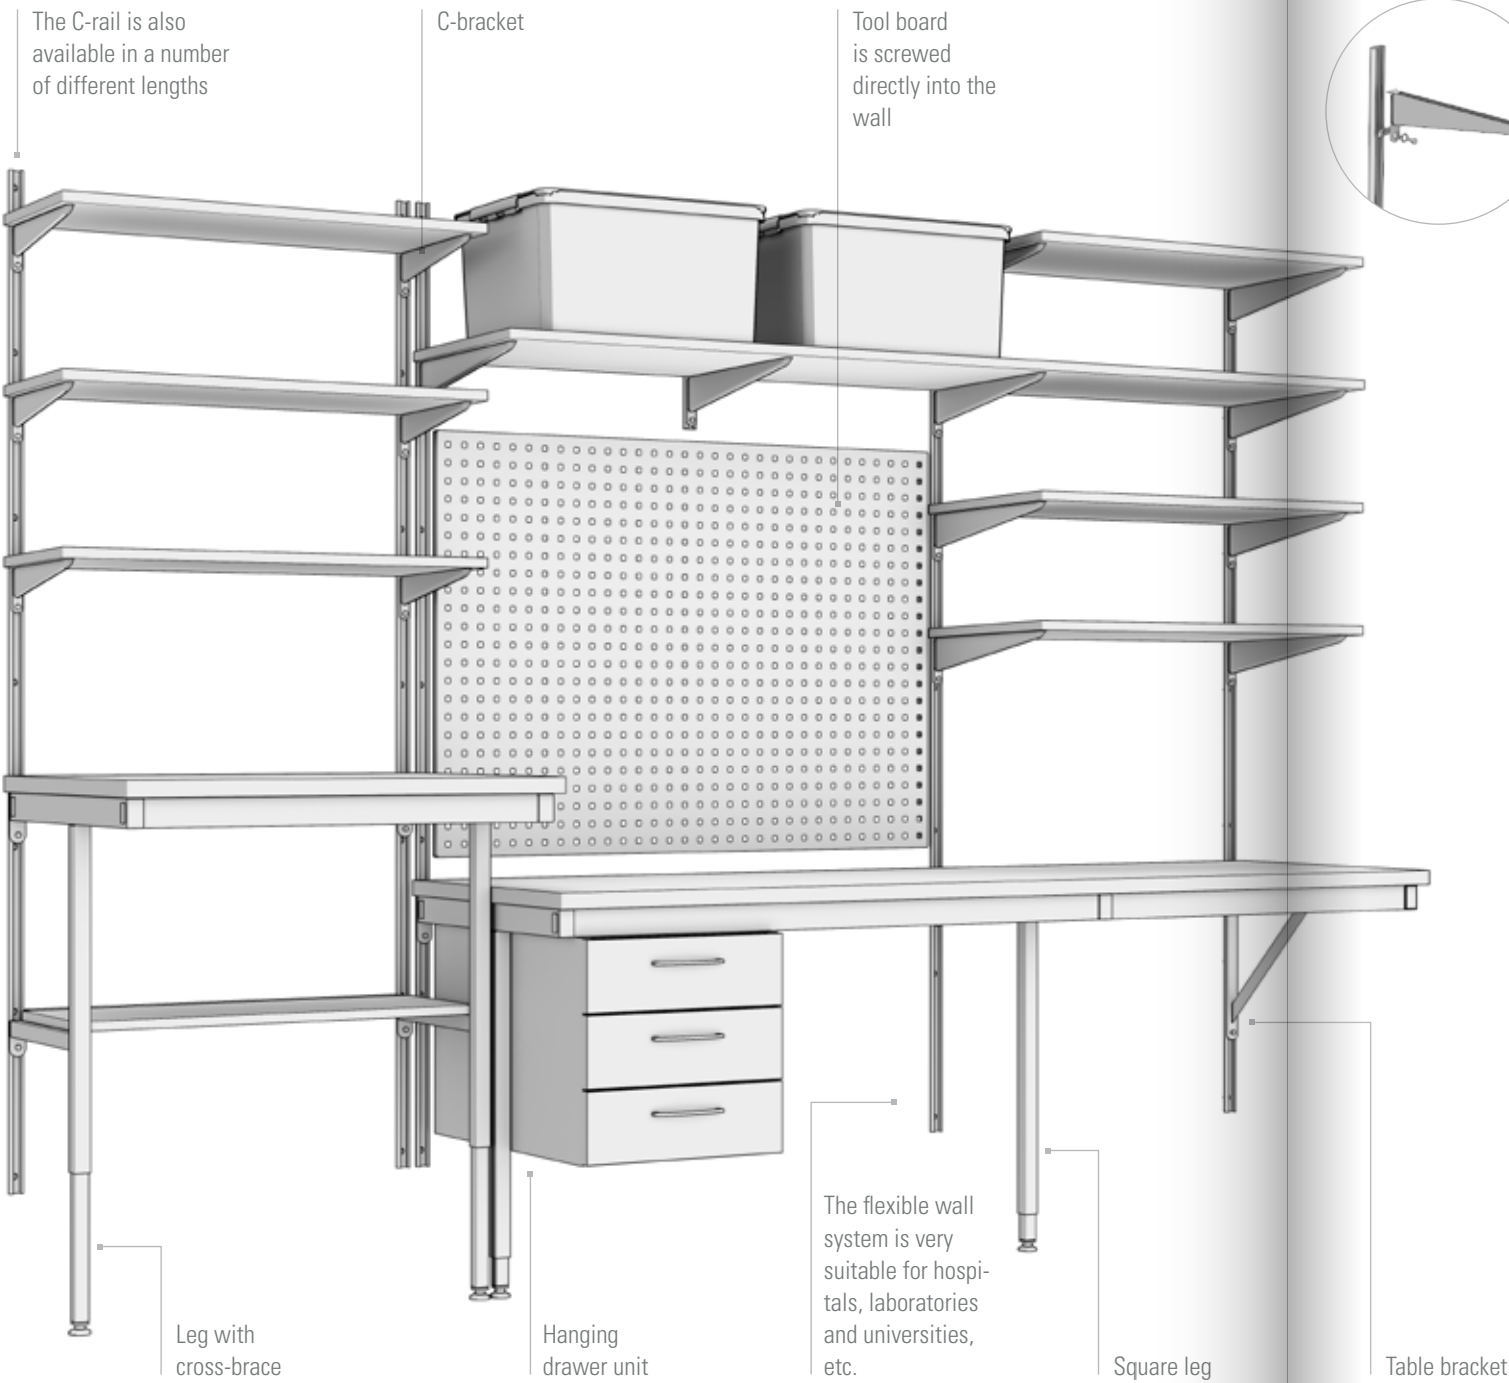

In addition what is shown above the Flexible hanging system product is also available - see page 24 and Work Tables - see page 92.

On the ceiling and floor system cabinets, benches, etc. can be mounted on both sides. As a result more functions are created in a smart way.

Adjustable wall system

Description of function

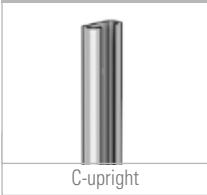

Choose an adjustable shelf system when you prefer a flexible height solution between shelves and table tops. These can be placed anywhere on the C-upright and are therefore not dependent on the division of the product's normal hole pattern. On the above solution a workplace and shelves are mounted which are precisely adjusted according to the user's preference, and you therefore have an ergonomically correctly adapted workplace. See measurements on page 125 and colours on page 120.

Adjustable wall system

Veneer: Birch

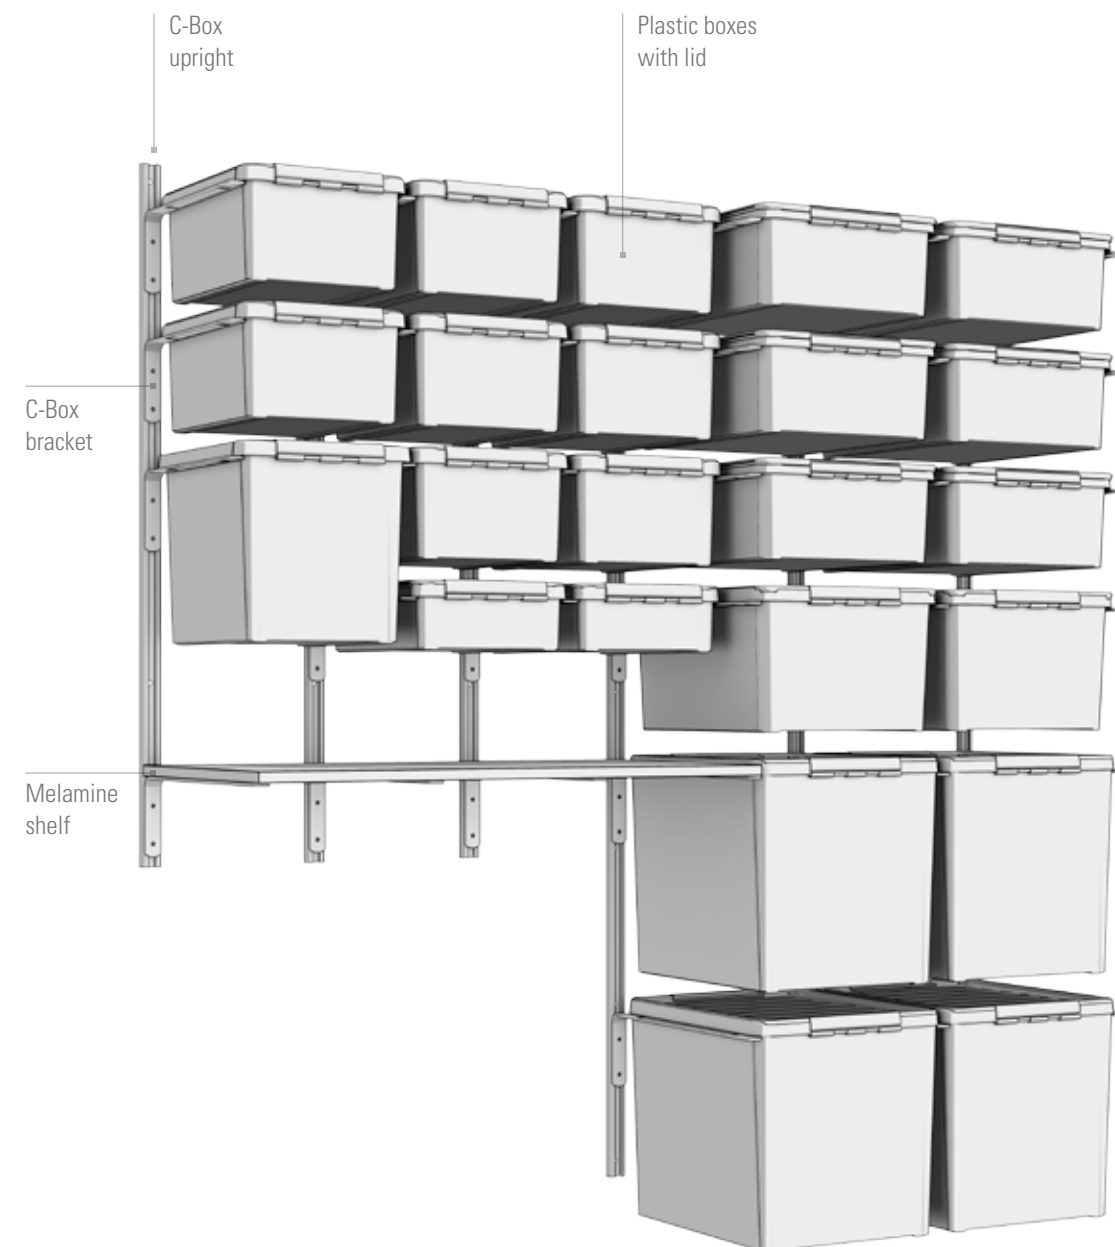

In addition to the above, the Permanent wall system is also shown – see page 10

Adjustable is here shown on the wall on the left combined with other solutions. A "Permanent" solution is shown in the image below.

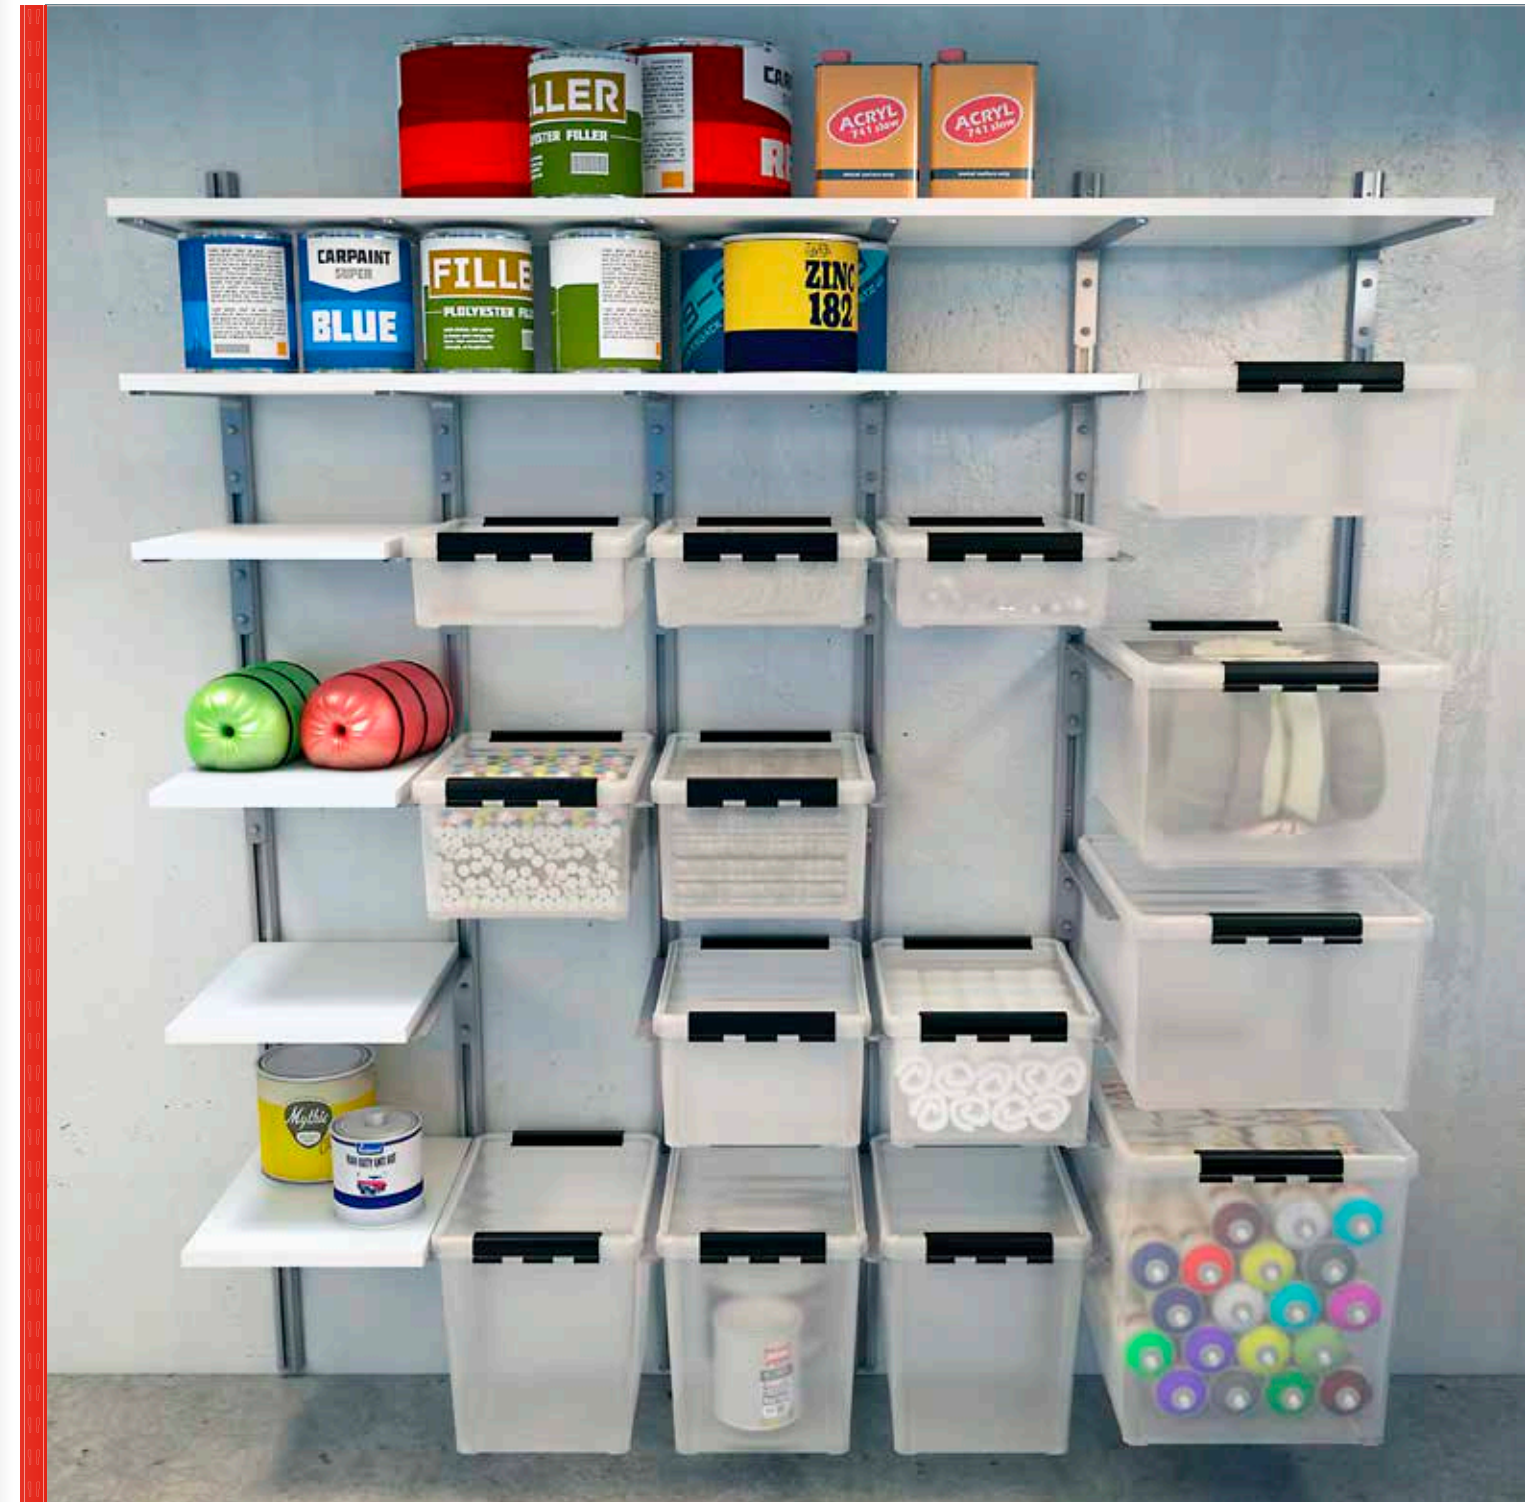

C-Box wall system

Description of function

The C-Box system is developed for the storage of all types of small items. On the wall uprights shelves of different widths can be mounted and plastic

boxes with lids, which are available in 6 different sizes. See measurements on page 126.

In addition to the above, industrial racks are also shown – see page 68. Work table – see page 92 and Trolley.

Hyllteknik's products stand for functionality, quality and design. They can withstand use and are therefore suitable for most types of environment.

Cloakroom

Description of function

Hyllteknik's Cloakroom interiors can be used in our shelf systems Permanent and Flexible, L + T stands and Ceiling and Floor System. You can choose a solution

that will be on walls, unrestricted in the room or a combination. The cloakroom interiors can be combined and adjusted to the heights that suit you.

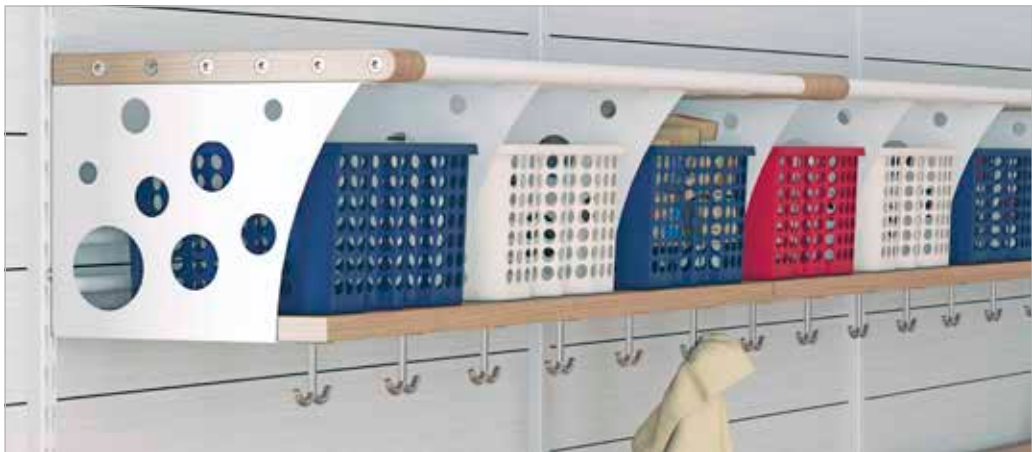

See measurements on pages 134-135 and colours on page 120.

Choose a flexible solution on wheels to achieve the ultimate flexibility. Cloakroom can be combined with all our other products, like for example the Flexible Hanging system which is shown here on the right.

Industrial rack

Description of function

The industrial rack is a stable, very strong and practical shelf solution which is made for tough environments where the loading requirements are of importance. The storage

boxes can be built entirely according to your needs or according to how the room looks. They are available in 2 different heights as standard. The industrial rack is supplied as

standard with our shelves with low back edges. But is also available with a high back edge or as wine rack. See measurements on pages 136-137 and colours on page 120.

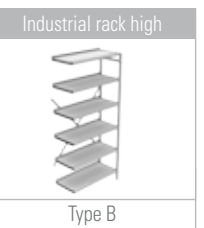

Industrial rack high

Strong, practical and sustainable

Industrial rack high

The industrial rack is available with a depth of 300-600 mm which is suitable for exhibitions or storage of a lot of small items. This strong shelf system can withstand 150 kg per shelf!

Sales and delivery terms

Sales terms

This catalogue does not list all of our products and variants. If you prefer specific manufacturing in other sizes, colours, etc., please contact us. When ordering, always state the article number and colour. All measurements are expressed in millimetres. Orders placed with measurements expressed otherwise will be delivered as above.

It is the responsibility of the customer/orderer to check that products, design, size and quantity on the order confirmation match the order placed. Products manufactured according to confirmed orders are deemed to be correctly produced and may not be repurchased.

Labelled packaging

To minimise packaging, packaging time and to prevent bulky freight all goods are delivered with a goods label/order. If labelled packaging for distinguishing the package is preferred (such as room number or floor) a fee of SEK 100/label will be levied excluding VAT. We however prefer to print multiple labels in the delivery note specification.

Payment terms

30 days net.

A penalty interest on arrears of 18% is charged with effect from the due date. Value Added Tax is added to stated prices.

Delivery terms

Goods are delivered ex-works (EXW). An estimated shipping cost is available on request.

Packaging

A charge is made for pallets, pallet collars, screened boxes and Masonite. Other packaging is free of charge.

Acceptance inspection

An acceptance inspection should be carried out upon receipt. Check that the number of parcels match.

Packaging damage should always be immediately recorded on the delivery note and signed by the driver.

Damage in transit

If damage to the goods has occurred during transit, this should be reported to the freight company/carrier within 7 days. Damage reported after this time will not be accepted and replaced.

NOTE! Always unpack and inspect the goods within 7 days!

Returns of products

Returns of products cannot be done without agreement. Specially produced, non-stock products cannot be returned and will therefore not be refunded. So please always contact us beforehand.

Approved returns are credited with 80% of the value of the goods. Shipping is not credited. In exceptional cases we may need to charge a handling fee. We will inform you about these when you contact us.

Delivery time

The delivery time indicated on the order acknowledgement is the delivery week from the factory unless otherwise specified.

NOTE! Stock goods, current maximum of 5 days delivery time.

Warranties

Hyllteknik is responsible for defects in design, material and manufacturing that appear with 2 years from the delivery date.

Damage in transit cannot be claimed under warranty. Where specific production is carried out based on drawing documents from the customer/orderer, Hyllteknik shall not be held liable for any shortcomings in design.

Reservations

For printing reasons variations in colour may occur. Contact us for more detailed information.

Chain

The console is made in massive solid wood which one can get in either birch or oak. The shelf itself is made of 1,5 mm sheet and is reinforced underneath.

Cover

A decorative panel made in sheet metal. By combining these in different colours its easy to build an own wall with desired expression. Decor panels also serves a holder for the string console which has been formed for this koncept. The console snaps over decorative panels and have spines in the top that matches the drilled shelves. You decide if and where you want the shelves. There are both straight and sloping shelves to choose from. In addition it's possible to replace three panels with a whiteboard. Design Mikael Jepson.
