STREAM
WHEN SPACE
BECOMES LIGHT.

THE FOCUS IS NOT ON THE LUMINAIRE, BUT ON PURE LIGHT...

INNOVATIVE

Stream is different. Stream illuminates the ceiling without a ceiling-mounted luminaire – it is a light source, but not the centre of attention

The ceiling itself is the reflective surface: architecture, space and light become one

PURISTIC

Reduced to a minimum, the high-grade aluminium luminaire blends in discreetly in any kind of office space – from open-plan to single office

Housing made of high-grade powder-coated aluminium

Hinge to enable perfect alignment can be tilted from -25° to $+25^{\circ}$

Version with a stand available in two heights
Stream Low 110 cm
Stream High 180 cm

Equipment box features a magnetic housing and can be attached to the stand, the table leg or in cable bracket on the desk

Operating module per workplace for switching, dimming, presence detection and daylight control
