ADAPTABILITY IN PERFECTION

CHANNEL S. PERFECTLY CONCEIVED DOWN TO THE LAST CENTIMETRE.

CAN BE PLANNED TO THE EXACT CM

The length of the complete system can be defined to the exact cm (with optics for Channel S LED and Channel S C-LED)

Profile, roll-up diffuser (optics Channel S LED) and micro-prismatic optics (Channel S C-LED) can be cut to the desired size on site

Through the combination of LED inserts in various lengths (from max. 3 m to min. 5 cm) batten luminaires in any length can be created in steps of 5 cm

Expansion compensation at the ends allows a clean closure of the light line

C-LED

Microprismatic C-LED optics

Optimum glare control for standard-compliant office lighting

DESIGN

"S" as in streamlined, with a width of just 65 mm and a height of 60 mm

Ends with expansion compensation guarantee a harmonic appearance

Support profile and ends (visible part) in natural anodised aluminium

No visible screws

VARIOUS MOUNTING OPTIONS

Recessed ceiling, ceiling and wall mounted, pendant mounting

EFFICIENT

Efficient optics and high luminous flux reduce energy consumption and lower overall costs for the lighting system in the long run

Failure rate limited to an absolute minimum and extremely low maintenance costs thanks to long lifespan

Maximum ergonomics for the user

ALSO AVAILABLE AS TUNABLE VERSION

Colour temperature can be adjusted to enhance the user's feeling of well-being

Stepless change between warm white and cool white light

2700 K

6500 K

SIMPLE TO INSTALL

Throughwiring in the system pre-mounted on the batten

Reduced installation costs

Rectangular canopy (optional)

System battens individually exchangeable on site

VARIABLE

Available as an individual or system luminaire
